

Woven Wrap

FITCOFLEX® -B-WRAP

FITCOFLEX-B-WRAP is a self closing protective sleeve made with a combination of polyethylene terephthalate (PET) monofilaments and multifilaments. The self-closing concept allows the sleeve to be installed easily onto pre-terminated wires or tubes, thus allowing installation at the end of the whole assembly process. The sleeve offers also very easy maintenance or inspection by just opening the wraparound.

It is a tough sleeve resistant to cut, designed to protect wire bundles and harnesses, hoses, tubing, and cable assemblies from mechanical damage and environmental hazards. It slips quickly and self-fits on irregular shapes and contours.

Operating temperature:	- 70° C to +150° C
Standard colors:	Black Other colors on request
Standard applications:	Wire harnesses Plastic pipes Rubber hoses

Description	Dimensions (mm)	
	ID Nominal	Max ID
FITCOFLEX-B-WRAP 6	6	8
FITCOFLEX-B-WRAP 8	8	10
FITCOFLEX-B-WRAP 10	10	12
FITCOFLEX-B-WRAP 12	12	14
FITCOFLEX-B-WRAP 15	15	18
FITCOFLEX-B-WRAP 20	20	24
FITCOFLEX-B-WRAP 30	30	35

Packaging:	Bundled segments in rings. Cut length on request.
