

Polyolefin Heat-Shrink Tubing

FITCOTUBE® FT555-AG

FITCOTUBE® FT555-AG is made of cross-linked polyolefin, with continuous inner air grooves to guide the air flow and prevent bulging or wrinkling caused by trapped air after shrinkage on curved rubber hoses. Its excellent abrasion resistance offers high protection of the automobile pipelines and extends their service life.

Operating temperature: -40°C to +125°C
Min. full shrink temperature: +125° C
